Named Styles Showcase

Reusable paragraph, run, and table styles now support *inheritance* and stable references across DOCX and PDF output.

One style change can now re-theme an entire document surface.

Checklist

Cover and body paragraphs inherit from shared base styles.

Inline runs can switch to named emphasis without repeating formatting.

Tables can pick up shared widths and border systems by style id.

Styled Summary Table

Metric	Value	Note
Approval State	Ready	Uses a named table style for consistent framing.
Body Copy	Centralized	Paragraph styles keep spacing and typography reusable.
Emphasis	Targeted	Run styles add accent treatment without duplicating direct formatting.
