Rich and paginated tables

Capability	Evidence	State
Repeated semantic header	Row properties survive OOXML reopen and PDF pagination.	Verified
Merged rich cell <i>Multiple paragraphs, mixed formatting, and a nested table share one typed cell model.</i> Nested key Nested value Semantic parity Preserved in DOCX and rendered in PDF		Green

Next-page section

The section break, landscape page model, margins, visible header/footer, and lower-Roman page fields all come from the same document projection.

Footnotes

1. The DOCX uses a real footnotes part; the PDF uses an inline marker and deterministic endnotes page.
